## *Press Release*

### **Cypress County Sod Turning Ceremony**

#### **Four Million Dollar Administration Building Expansion and Renovation Project**

**When: Monday June 15, 4:00 pm**  
**Where : Cypress County Administration Building**  
**816 2nd Avenue, Dunmore Alberta**

Since 1985, Cypress County has grown significantly in population. Along with that growth there has been an increase in standards and the services provided for the residents and businesses. Over the past two decades, staff increases have resulted in cramped working conditions, such as employees sharing offices or working in a 2 x 2 metre cubicle.

As a result, council determined that more room was needed to continue to provide the high level of services. The expansion will include a new, larger council chamber, meeting rooms, and more office space for all departments. Renovations include a new public entry way, an elevator to the second floor to better serve the elderly or persons with disabilities, and an expanded parts room. Significant upgrades to windows and fixtures will increase the energy efficiency of the building. Parking for the public and staff will also be expanded and improved. Continued public access to the office will be maintained throughout the year of construction.

This project is made possible with the financial assistance of the Provincial Government through the Municipal Sustainability Initiative Program (MSI).

Wahl builders has been awarded the contract and are expected to begin construction any day. Sahuri & Partners Architecture Inc have done the design in consultation with staff.
